

Reimbursable

ThermoActive
medical®

Cold Compression Therapy

... PROVIDES THE COLD COMPRESSION THERAPY YOU REQUIRE
... THAT YOUR PATIENTS' NEED
... AND NOW WITH FULL **L-CODE** REIMBURSEMENT

THERMOACTIVE MEDICAL® DEVICES ARE NOT AVAILABLE TO THE PUBLIC!

Although ThermoActive Medical® products have been designed for each body segment the following benefit's are common to them all:

- **Durable, Washable, Velcro Compatible Fabric** can be used for daily living to sports
- **Built-In 'Compressor Panels' with Pump** provide adjustable, uniform compression
 - Edema control, protection, minimizing high pressure areas
 - Total contact with our Gel Packs offers quicker deep cold/heat treatments
- **The Highest Grade Body Specific Shaped Cold/Hot Packs with unique design**
 - Easily removed to provide uniform cold or heat therapy
 - Combining our cold/hot packs can provide 360° coverage
- **Additional joints and 'thermoformable' panels** provided added function and control
- **Minimum number of sizes** to fit a maximum number of patients
 - Free Extension Straps add 13" of circumference when required
- **Priced right for both cash and carry patients as well as REIMBURSABLE Clients**

L-0631 *\$945.00

Full Line of Reimbursable ThermoActive Medical® Devices

L-1832

ROM Knee System

- Controls flexion and extension in 15° increments.
- Controls excessive medial / lateral movements.
- 'Extender' straps add up to 12" of circumference.
- Easily adjustable compression to limit edema.
- Ideal for sprains, strains, post-op contractures.

L-1810

Polycentric Knee System

- Controls hyperextension of the knee.
- Controls excessive medial / lateral movements.
- Helps with Patella tracking.
- Easily adjustable compression to limit edema.

L-3760

ROM Elbow System

- Controls flexion and extension in 15° increments.
- Easily 'bent' to fit, if required.
- Ideal for sprains, strains and post-op recovery and contractures.

L-3710

Polycentric Elbow System

- Controls hyperextension of the elbow.
- Controls excessive medial / lateral movements.
- Easily adjustable compression to limit edema.
- Helps control elbow motion.

L-0631

LSO High Back System

- Now Includes heat moldable anterior and posterior supports located in custom pockets.
- May be used with or without the gel pack.
- New 'floating D Rings' fit more patients and increases their comfort level.
- Custom lumbar compression.

L-0627

LSO Low Back System

- Includes heat moldable anterior and posterior support panels for customized control.
- Can be worn with or without molding.
- Customer adjustable lumbar compression.

L-3670

Shoulder (Left and Right Available)

- Provides 'total contact' for any anatomy which may limit edema of post surgery or trauma.
- Customized cold/hot pack may improve comfort.
- Patients can often put this on by themselves.

L-3908

Functional Wrist System

- Includes an adjustable, aluminum support.
- Controls flexion and extension.
- Customer controls compression and edema.
- Ideal for sprains, carpal tunnel and post-op.

Additional Gel Packs Can Be Added to Increase the Area Being Cooled/Heated

- Two (2) sizes available
- Velcro tabs allows for easy placement

Small

Large

Placing an additional gel pack behind the knee (attached to the straps) provides 360° coverage
